

Course Portal Enhancement & Secure Resource Management

Date

June 12, 2026

Overview

This update introduces enhancements to course visibility management, secure document handling, trading course UI optimization, and backend resource management. The goal is to improve the learning experience while ensuring that premium educational content remains protected and accessible only to authorized users.

1. Course Visibility Control

Feature Description

Course visibility is now controlled automatically based on content availability.

Visibility Rules

- Courses remain hidden from students when no videos have been uploaded.
- Even if a student is already enrolled, the course will not appear in their learning dashboard until at least one video is available.
- Once a video is uploaded to any module, the course automatically becomes visible to enrolled students.

Benefits

- Prevents students from accessing empty courses.
 - Eliminates "No Content Available" experiences.
 - Ensures learners only see courses that are ready for consumption.
-

2. Trading Course Dashboard Optimization

The Trading Course interface was simplified to focus on the actual learning content.

Removed Information

The following metadata was removed from:

- My Learning Page
- Course Cards
- Trading Course Dashboard

Removed fields:

- Course Duration
- Learning Hours
- Weekly Duration Information

Result

- Cleaner user interface.
 - Reduced visual clutter.
 - Greater emphasis on videos, progress tracking, and learning resources.
-

3. Secure PDF Upload and Viewing System

A secure document management system has been implemented to support learning materials.

Upload Support

Administrators can now upload supporting course documents directly from the admin panel.

Supported Formats

- PDF (.pdf)
- Naming conventions are-Java.pdf,Java_Types.pdf

Upload Process

1. Open Admin Dashboard.
2. Select an existing video or create a new video.
3. Navigate to the Document Upload section.
4. Attach one or more supported files.
5. Save the video.

Storage Process

- Documents are uploaded to secure cloud storage.
- Metadata is linked to the corresponding video.
- Resources become available to enrolled learners automatically.

Document Metadata Structure

Each uploaded document stores:

- File Name
- File Type
- File Size
- Storage Location
- Associated Video Reference

Benefits

- Organized resource management.
 - Easy attachment of study materials.
 - Centralized content administration.
-

4. Secure PDF Access Control

To protect premium learning materials, document access is secured through backend authorization.

Security Features

- Authentication required before accessing documents.
- Enrollment verification performed before file delivery.
- Direct public access to protected resources is restricted.
- Documents are streamed through secure backend endpoints.
- Unauthorized users cannot access learning materials.

Benefits

- Enhanced intellectual property protection.
 - Controlled access to educational resources.
 - Improved platform security.
-

5. Course Detail Page Enhancements

Improvements

- Secure PDF viewing integration.
- Improved document management interface.
- Better organization of learning resources.
- Cleaner content presentation.
- Improved responsiveness and usability.

Learning Experience Benefits

- Faster access to supporting materials.
 - Improved navigation.
 - Better content discoverability.
-

6. Backend Enhancements

Resource Management

The backend now supports:

- Secure document uploads.
- Protected document streaming.
- Course visibility validation.
- Enrollment-based access control.

Automatic Cleanup

When administrators remove:

- Videos
- Documents

Associated cloud storage resources are automatically removed to prevent unnecessary storage usage.

Benefits

- Reduced storage costs.
 - Improved system maintenance.
 - Prevention of orphaned files.
-

Testing & Verification

Verified Features

- ✓ Course visibility after video upload
- ✓ Course hidden when no videos exist
- ✓ Enrolled users cannot access empty courses
- ✓ Trading course duration and week information removed

- ✓ Secure PDF upload functionality
 - ✓ PDF metadata storage
 - ✓ Backend authorization for documents
 - ✓ Protected resource delivery
 - ✓ Frontend and backend integration completed successfully
-

Outcome

The platform now provides:

- Automated course visibility management.
- Cleaner Trading Course dashboard experience.
- Secure PDF and document upload workflow.
- Protected access to educational resources.
- Improved learning experience for enrolled students.
- Better administrative control over course publishing.
